Vision

A BOUNDLESS LIGHT

Espica is a company capable of covering all the needs of modern lighting designers.

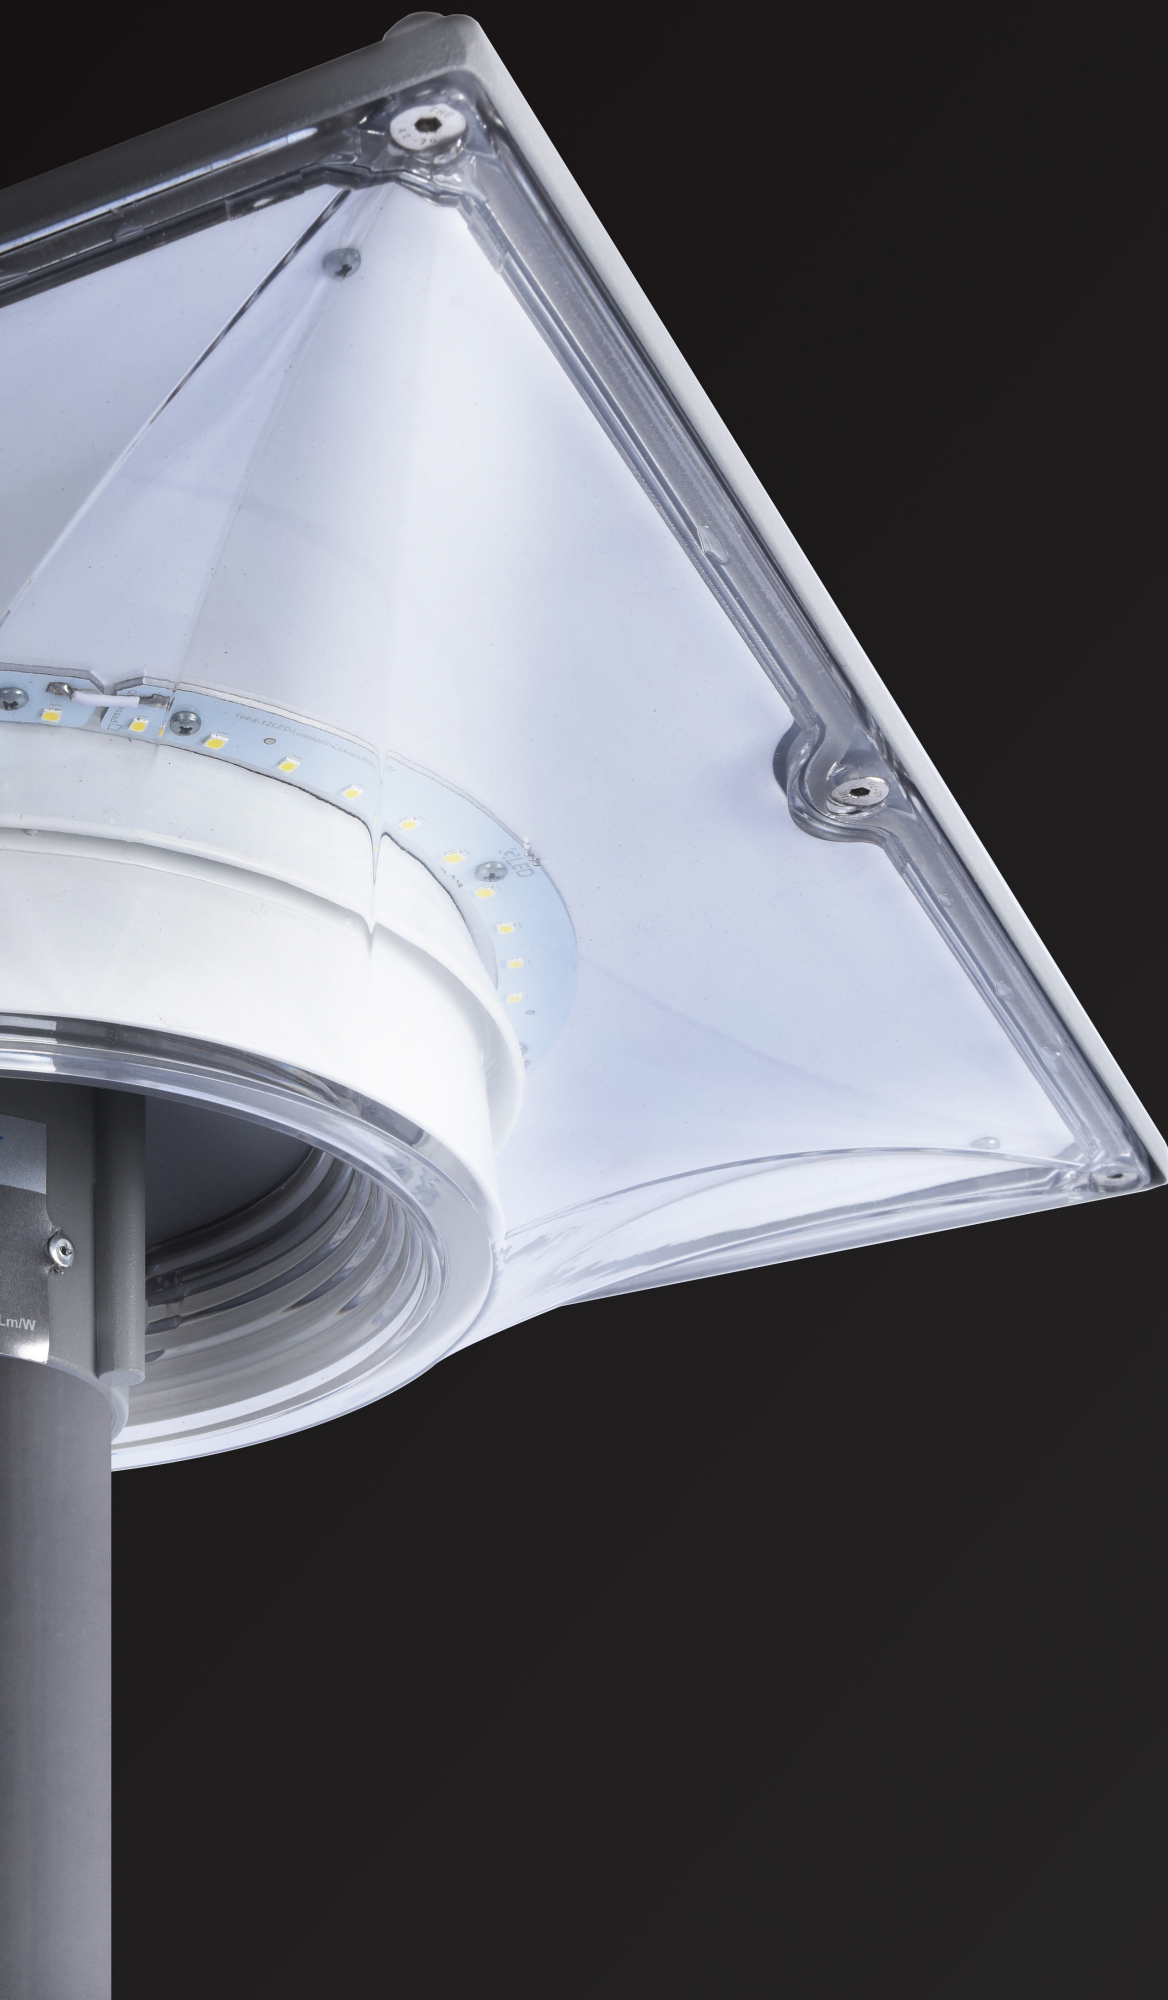

Thanks to a perfect mix of experience in the lighting industry and innovation, today we are able to bring our knowledge to new markets and attract customers from all over Europe and from the international market.

Espica's vision is clear and transparent, we want to be as close as possible to the **needs of our customers**.

For this reason, over the years, we have expanded the range of our products so as to obtain a complete and functional catalog for each project.

Espica products' are available at high quality and maintain an excellent cost-quality balance.

Espica,
your new technical lighting partner.

Mission

YOUR NEEDS, OUR KNOWLEDGE

We have a **global approach** to light.

Our mission is promoting the lighting industry based on **research & development**, producing and providing the best-quality innovative commodities and designs.

Our production processes are internalized: we have a production center where we take care of all the components of our products.

We have many years of experience in lighting industry (OEM Business) with special knowledge of **led technologies**.

We supply component, raw materials and finish products for customers in Middle east, CIS and Europe.

Espica works with excellent **technical lighting partners**, providing design advice that can satisfy the most demanding expectations, researching the best solutions to illuminate interior and exterior spaces with tailor made solutions to enhance the beauty of a place and its functions.

ENDLESS CUSTOM POSSIBILITIES

We manufacture and encourage the use of **eco-friendly outdoor products**, fulfilling a vast range of market demands by designing and offering an extensive collection of outdoor products.

We train and benefit from an expert and up-to-date workforce. Last but not least we follow a **customer oriented perspective** to represent and meet public and specialized needs.

Dimmability is an option that can be provided in products. In outdoor products we can add **Lighting Management System** for a specific lighting project.

This system, based on wireless protocols, can control and monitor the features and project status through internet. Some luminaire accessories such as motion sensor can be added in specific products.

For street lighting and flood lights, special light distribution for specific applications can be provided.

OUR PRODUCT RANGE

Today's lighting projects are complex and demanding.

For this reason Espica offers a **range of functional lighting products** for all applications.

Our idea is to offer to all customers a complete catalogue built around product quality and lighting performances.

We produce post-top luminaires and floodlights for street and outdoor lighting, bollards for urban lighting, downlights and linear systems for the architectural segment and more.

Our R&D department is constantly looking for **new technologies** and works to build the most performing and cutting-edge products with maximum attention to customer needs.

WORLD PRESENCE

We have a deep-rooted and strong presence all over the world.

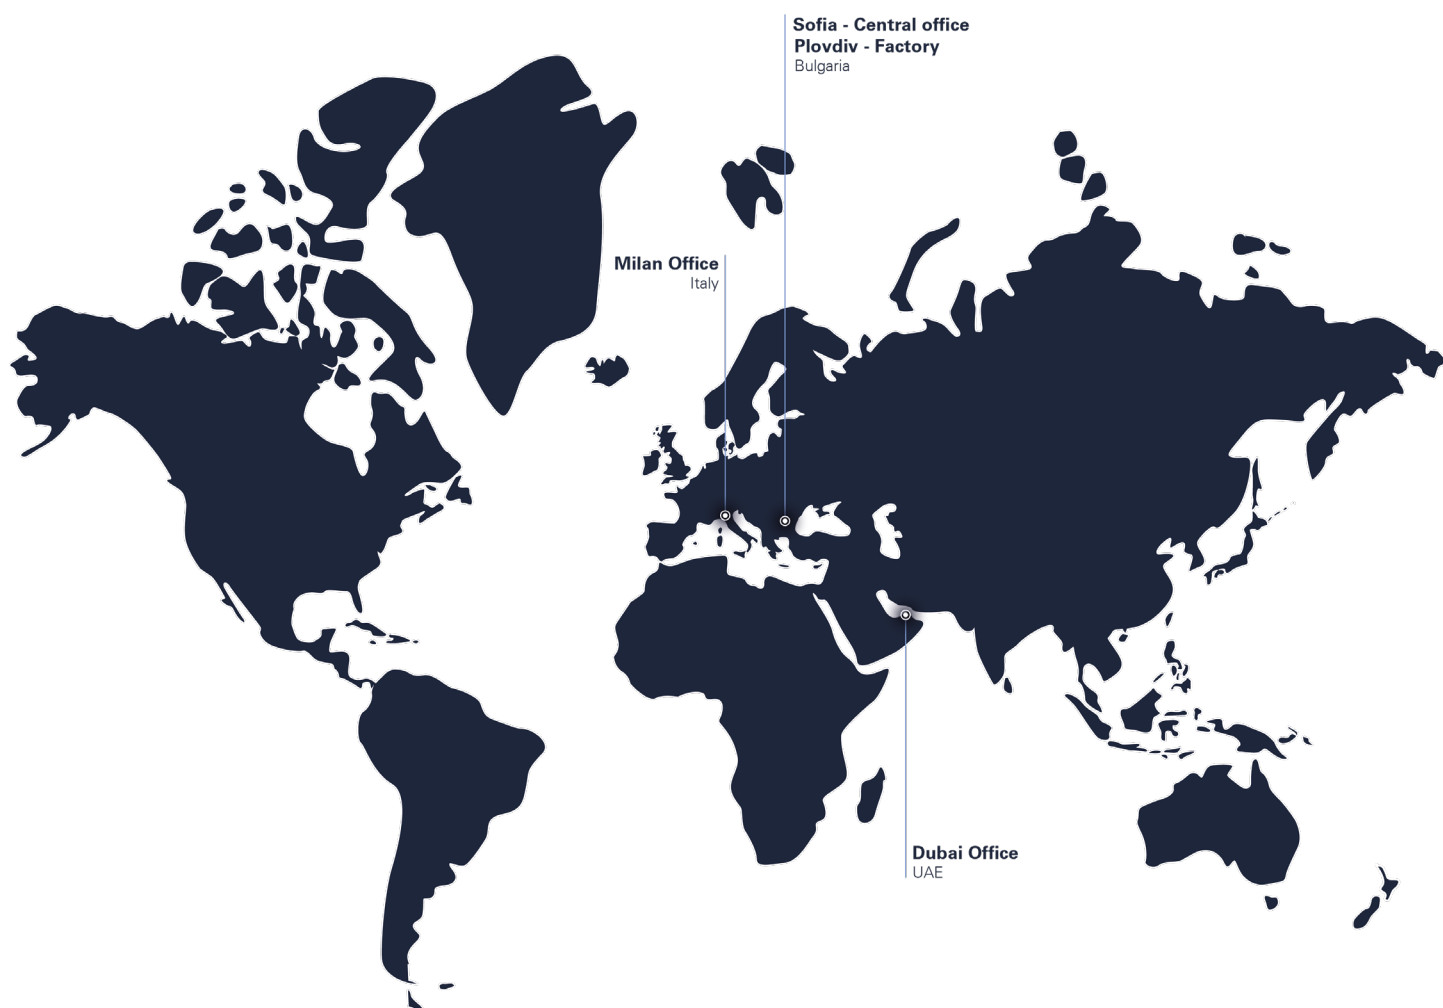

We are particularly careful to develop a **follow-up of projects** on a local scale.

Our service doesn't stop at the sale of lighting fixtures, we believe in **customer assistance** and support for all the professionals who need lighting consultancy. Being a **lighting partner** means - in practice - supporting our customers throughout the process of managing the lighting order.

The operational headquarters and production are based in **Bulgaria**, directly facing the European market.

Our Research & Design laboratories are located in **Milan**, in the heart of the old continent.

We have a solid commercial network located in **Dubai**, where one of our showrooms is also located.

TEAM

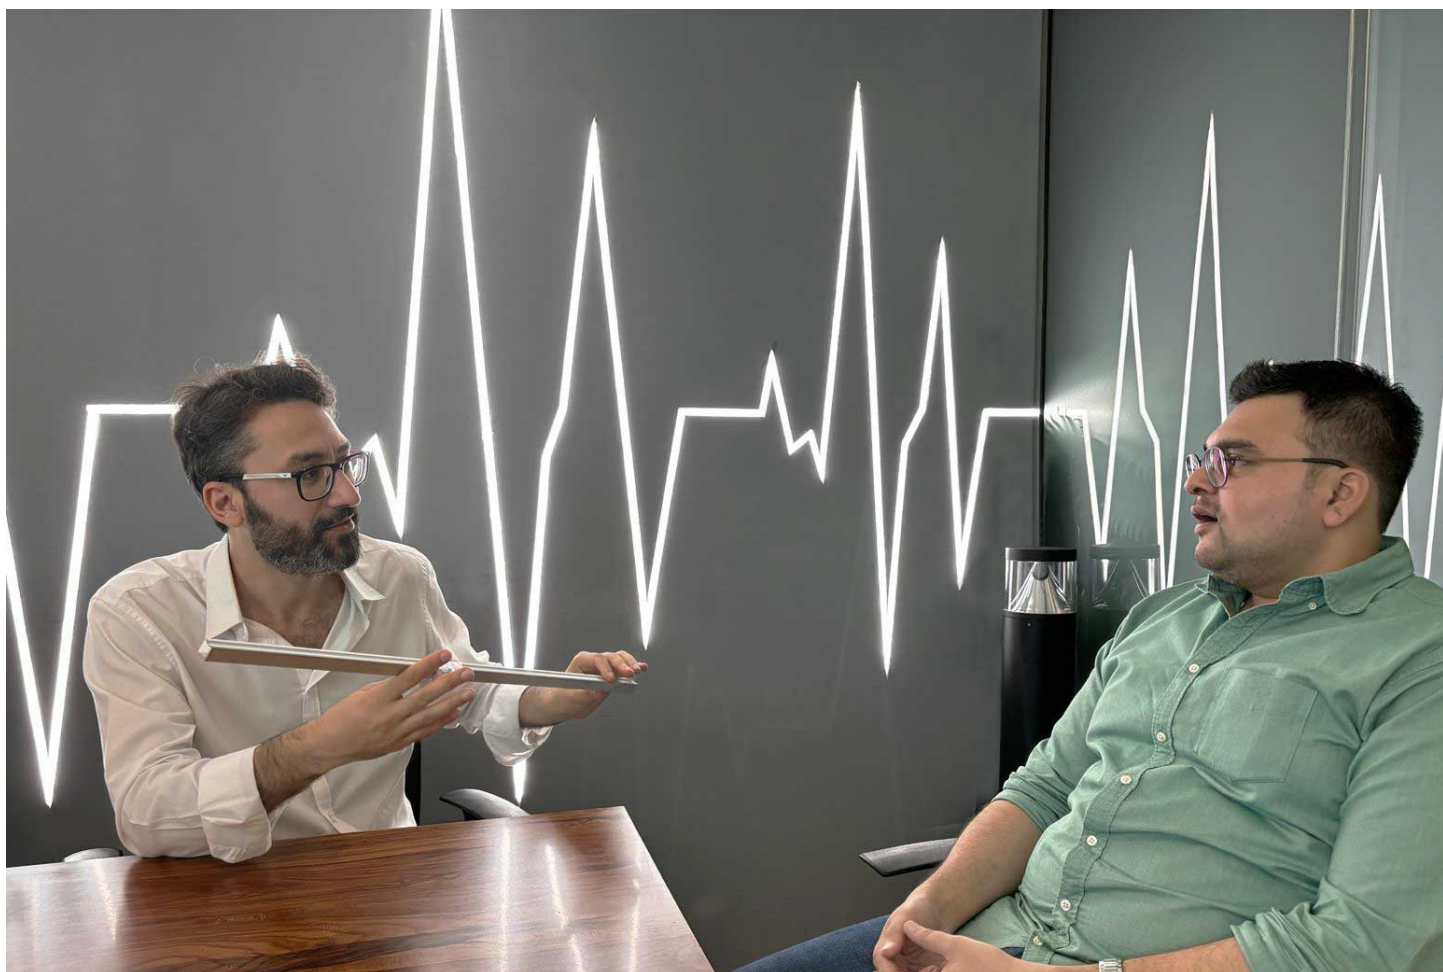

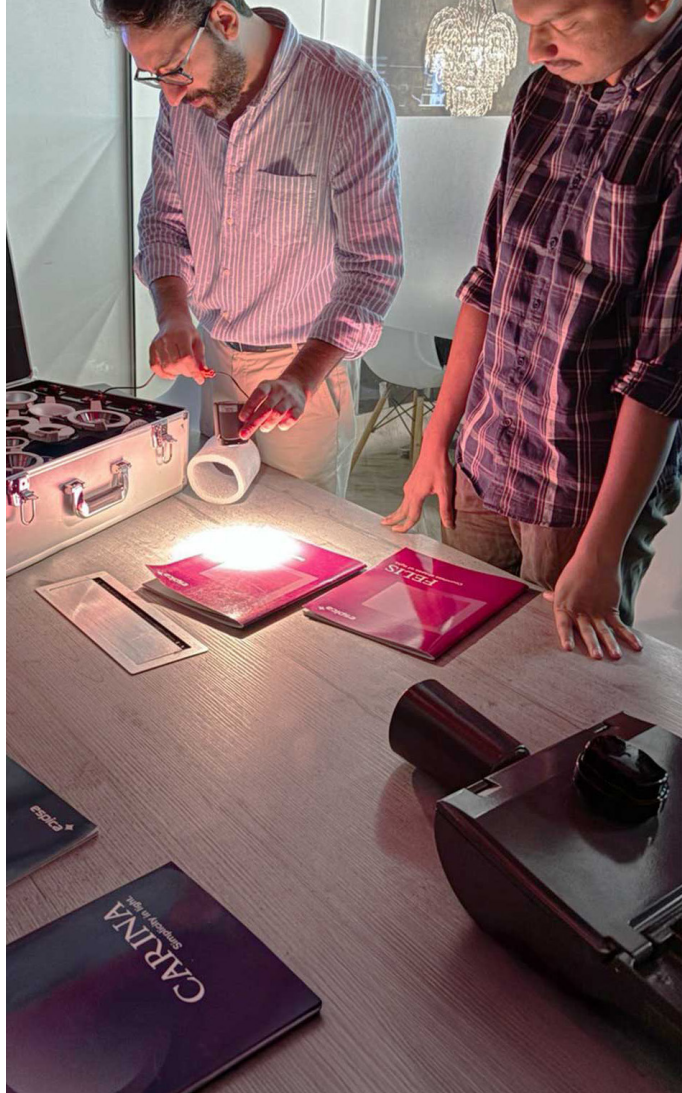

OUR TEAM

Our **Dubai-based team** brings together international expertise and a forward-thinking approach to innovation.

We design and manufacture high-quality lighting fixtures, with a **strong focus on street and industrial lighting**. Every day, we collaborate to deliver efficient, sustainable, and technologically advanced solutions that enhance safety and comfort in both urban and industrial environments.

Our strength lies in diverse yet complementary professional backgrounds, united by the goal of transforming ideas into reliable and long-lasting lighting performance.
